Professional Summary

Full Stack Developer with ~2 years of experience building scalable web applications using modern MERN stack technologies. Experienced in developing Single Page Applications (SPAs), RESTful APIs, real-time systems, and CMS platforms while optimizing performance and user experience. Strong expertise in React.js, Node.js, and MongoDB, with experience integrating third-party services, building real-time features, and collaborating within Agile development environments to deliver production-ready applications.

Skills

Frontend: React.js, Next.js, JavaScript, TypeScript, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Material UI, PWA, Axios
Backend: Node.js, Express.js, MongoDB, Mongoose, SQL, JWT, REST APIs
Tools: Git, Github, VS Code, Postman, Vercel, Render
Other Skills: RESTful APIs, Cross-Browser Compatibility, Agile Development

Experience

Software Engineer **March 2024 – Present**
Codes for Tomorrow *Indore (MP), India*

- Developed Single Page Applications (SPA) using React.js, building reusable components with React Hooks, Redux Toolkit, and Context API, while implementing responsive UI using HTML5, CSS3, JavaScript and Tailwind CSS.
- Integrated frontend applications with RESTful APIs using Axios, implemented authentication, data fetching, and error handling while collaborating with backend services built using Node.js and Express.js.
- Designed and maintained backend APIs, implemented CRUD operations, middleware, and business logic, and worked with MongoDB databases for scalable MERN stack application development.
- Integrated multiple third-party services and APIs such as payment gateways, authentication services, and external data providers to extend application functionality.
- Trained and mentored interns to ensure productive project contributions.
- Optimized frontend performance, reducing load times and improving overall application responsiveness.

Projects

Auction Platform | Node.js, React.js, Express.js, REST API, MongoDB, Tailwind CSS

- Developed a full-stack Auction Management Platform enabling users to participate in multiple simultaneous sports auctions, featuring secure authentication and role-based authorization for users and admins, along with subscription-based access through integrated payment gateway.
- Implemented real-time bidding and auction updates using WebSockets (Socket.io), built scalable REST APIs for auction management, bidding, and transactions, and delivered a responsive interface supporting seamless live auction participation.

Raj Express – News Website, Admin CMS & Page Builder | React.js, Next.js, SSR | rajexpress.com

- Developed the Raj Express digital news platform including the public news website, Admin CMS, and dynamic Page Builder, while leading the team during the development and implementation of the project, enabling editors to create, manage, and publish news content efficiently.
- Implemented features for content management, article publishing, media handling, and customizable page layouts, improving editorial workflow and enabling scalable news delivery for high-traffic users.

iGaming / Sports Betting Platform | React.js, Tailwind Css, REST API Integration, RTK Query

- Developed responsive interfaces for real-time sports betting and casino games, building dynamic components such as sports sidebars, event listings, provider filters, and betting market views to support multiple sports and live events.
- Integrated APIs for real-time sports events, betting markets, and game provider data, and worked on admin panels to manage events, betting markets, providers, and platform configurations.

Education

Bachelor of Technology – Computer Science and Information Technology **2020 –2024**
Institute of Engineering and Science, IPS Academy, Indore
